Curriculum Vitae

Ruth Bourke B. Sc. (Hons) LBIST

Ruth Bourke
B. Sc. (Hons)
LBIST

Ruth Bourke's career in removable prosthodontics began over 25 years ago under the guidance of Dr. John Besford, first as a technician for Guy's Hospital and later as a senior technician and instructor at both the Eastman Postgraduate Dental Institute and the Royal London Hospital Medical College. In 1994, she joined the academic staff of Manchester Metropolitan University as a Senior Lecturer in the Department of Materials Science, where she taught implantology, complex partial denture design, and complete denture occlusion. Ruth later moved to the United States to take the post of Oral-Maxillofacial Prosthetic Technician at the University of Washington. Prior to opening her own laboratory, RE Bourke, LLC this year, she established and managed the removables department at Protea Dental Studio in Redmond, Washington.

Ruth regularly lectures and teaches courses in the field of dental technology both in the U.S. and abroad, and is widely becoming recognized as one of the top experts in denture aesthetics. Ruth has also collaborated with dental manufacturer Davis Schottlander & Davis Ltd. to produce the Enigma Denture System, which won the Queens Award for Industry in 2004.

16 CE Credits For Attending

2 Days Hands-On Course by Ruth Bourke B. Sc.

Ruth Bourke will present the philosophy of "Prosthodontic Privacy" as developed by Dr. John Besford with specific regard to the patient-centered treatment modalities including:

- The doctor-patient review (establishing the patient's autonomy)
- The role of the dental assistant as the patients advocate
- The dental technicians participation in the patients "story"

Biographical denture fabrication techniques such as:

- Building the prosthesis from the outside in for correct lip support
- Aesthetic tooth positioning
- Anatomical gum carving
- Custom coloring denture flanges using Enigma Color Tones
