## The Clinicians Programs

Parts 1, 2 & 3

**By the end of the programs the participants should better understand:**

- the underlying principles of prosthetics
- how, by involving the patient, the clinical outcome can be improved
- how to assess the front tooth position
- how to improve their understanding of impression taking including primary, the French impression, the upper working impression and the lower primary impression
- how to better optimize the border seal
- when & how to use magnetic attachments
- how to improve their knowledge of record rims, measuring the vertical dimension of the face and checking speech
- the purpose of the gothic arch technique and how to apply it
- how to check the anterior set up
- how to take the retruded (centric) jaw relationship
- how to take a face bow record
- how to chose teeth and gingival coloration
- how to use the follow-up visits to improve patient satisfaction

Available on VHS & DVD

Running Time: Approx. Part 1: 30 minutes, Part 2: 23 minutes, Part 3: 25 minutes

## The Technicians Programs

Part 1 & 2

**By the end of the programs the participants should better understand:**

- how to use patient photographs or casts taken from a relative to chose the correct width and shape of tooth
- the underlying principles of prosthetics in the dental laboratory
- how to set-up the anterior teeth
- how to set-up the posterior teeth
- the different techniques for waxing in natural features including 'S' curves and the rugae and creating more natural surface effects
- the flasking of the denture and in-flask correction
- the principles of natural gingival coloring and how to reproduce it in the denture
- how to de-flask the denture so that the natural effects that have been created are not lost in doing so.

Available on VHS & DVD

Running Time: Approx. Part 1: 20 minutes, Part 2: 20 minutes
